

Distribution Report

Monthly Report

April 2014

The month of April has let us get outside to start distribution repairs. We replaced two broken valves. One of the valves had us replacing thirty feet of pipe and installing a new fire hydrant. Repaired a water service at south 12th St. Tamped water leak holes, poured cement at well house #1. Sawed all our leak holes that were in the street or driveways and started leak hole repairs. We made taps and loaded out two hydrants. We repaired one leak at 2790 7th Ave that we had to re-pipe the water main out and around a sanitary sewer man hole.

In addition we also did the following

Fixed water leak

- 2790 7th Ave

Hydrant maintenance: 8

Service taps: 24

Measure new curb boxes: 11
