

# Distribution Report

## Monthly Report

June 2014

We started our first main project for the summer on 14<sup>th</sup> St. between Henderson Drive and James Drive. This replaced the four inch water main that froze last winter. Finished the rest of our leak holes, did yard work, locates, concrete work on 14<sup>th</sup> St. and made service taps in Bridge Creek 3<sup>rd</sup> Addition which is off of Winslow Road and also Bowman Meadows 3<sup>rd</sup> Addition which is west of Alburnett Road and south of Boyson Road. During the course of the city's asphalt milling process this spring we were able to get a dozen loads for our parking lot that we spread out over the gravel part of the lot. We loaded out fourteen hydrants.

In addition we also did the following

Leakhole repair: 6

Service taps: 45

Measure new curb boxes: 13

Locates: 10

Hydrants loaded out: 14
